

how to use this guide:

This guide provides the access numbers for our Internet Dial Access Service.

To dial a number:

1. choose the nearest location for the subscribed service;
2. insert numbers with local dialing prefix into your PC dial application;
3. initiate call from application.

help

If you encounter a problem, check:

- * that you have entered the correct telephone number;
- * that any access digit (e.g., 0 or 9 for an outside line) is correct;
- * that you are using the correct local dialing instructions (remove the country code);
- * whether the telephone line is using pulse or tone and set your communications software accordingly;

- * that there is a dial tone on the line;
- * if you believe it to be an application problem, please follow the fault reporting procedure of the application provider;

- * if any of these do not resolve the problem, please consult your Customer Service Center Directory or www.orange-business.com for your nearest support center.

Regulatory Information

These telephone numbers are provided for the exclusive use of our contracted corporate customers.
The list of available locations is subject to change as warranted by regulatory developments.

news and highlights in this edition

service coverage:

total countries	120
total access points	1265
IP access points	1165
V110 access points	16
V110 access countries	13
Toll Free countries	48
Local Access countries	18

change summary:

- | | |
|----------------------------|--|
| 1) New site installation | French Guiana PPP |
| 2) Telephone number change | Nicaragua: new dial plan with a new digit (additional '2') / hotcut on April 1st 2009 |
| 3) Site Removal | Costa Rica (San José X28 PAD)
Bolivia (Santa Cruz and Cochabamba X28 PADs)
Taiwan (Hsinchun and Tainan X28 PADs) |

new country availability:

No changes this month

new site installation:

country	city	number	speed	protocol
French Guiana	Cayenne	[594] (0)594285005	high	PPP

telephone number change:

notes:

- 1) the maximum speed supported at X.28 low speed/high speed access points is 14.4K/28.8K respectively. The PTT infrastructure may restrict access to lower speeds.
- 2) the IP POPs can provide a maximum PSTN access rate of 56K, if the PTT infrastructure allows it. ISDN access at 64K will be provided if the PTT provides the service in that city/country.
- 3) the number cannot be accessed from outside the particular country.
- 4) the full number starting with "0" is called for both local and national calls.
- 5) the full number is called for both local and national calls.

- 7) the access point has been tuned for V110, which provides ISDN digital mode access for GSM phones. All other access points provide analogue access for GSM phones.
- 8) the number cannot be called from outside of the city limits.
- 9) in Brazil a number of carriers can be used to support the call: 12 = CTBC telecom, 14 = Brasil Telecom, 15 = Telefonica, 21 = Embratel, 23 = Intelig, 25 = GVT, 31 = Telemar.
- 10) all calls within the country are free.
- 11) GSM access to this number is blocked.
- 12) the number cannot be used in the capital's city limits.
- 13) only one ISDN/PSTN charge band applies across the whole country.
- 14) the toll-free number in India is only available to MTNL and BSNL subscribers.
- 15) In Georgia national calls are made by dropping "32" and adding "822" to the local number.
- 16) In the Ukraine, Toll-free calls outside of Kiev need to have "8" added to the front of the number.
- 17) In Canada and the USA a number of the cities have changed to 10 digit dialling for the local number.

These telephone numbers are provided for the exclusive use of our contracted customers.

The list of available locations is subject to change as warranted by regulatory developments.

	Jiang Men	BJS	[86] 4006744444	ISDN & PSTN	IP	

notes:

- 1) the maximum speed supported at X.28 low speed/high speed access points is 14.4K/28.8K respectively. The PTT infrastructure may restrict access to lower speeds.
- 2) the IP POPs can provide a maximum PSTN access rate of 56K, if the PTT infrastructure allows it. ISDN access at 64K will be provided if the PTT provides the service in that city/country.
- 3) the number cannot be accessed from outside the particular country.
- 4) the full number starting with "0" is called for both local and national calls.
- 5) the full number is called for both local and national calls.

- 7) the access point has been tuned for V110, which provides ISDN digital mode access for GSM phones. All other access points provide analogue access for GSM phones.
- 8) the number cannot be called from outside of the city limits.
- 9) in Brazil a number of carriers can be used to support the call: 12 = CTBC telecom, 14 = Brasil Telecom, 15 = Telefonica, 21 = Embratel, 23 = Intelig, 25 = GVT, 31 = Telemar.
- 10) all calls within the country are free.
- 11) GSM access to this number is blocked.
- 12) the number cannot be used in the capital's city limits.
- 13) only one ISDN/PSTN charge band applies across the whole country.
- 14) the toll-free number in India is only available to MTNL and BSNL subscribers.
- 15) In Georgia national calls are made by dropping "32" and adding "822" to the local number.
- 16) In the Ukraine, Toll-free calls outside of Kiev need to have "8" added to the front of the number.
- 17) In Canada and the USA a number of the cities have changed to 10 digit dialling for the local number.

These telephone numbers are provided for the exclusive use of our contracted customers.

The list of available locations is subject to change as warranted by regulatory developments.

notes:

- 1) the maximum speed supported at X.28 low speed/high speed access points is 14.4K/28.8K respectively. The PTT infrastructure may restrict access to lower speeds.
- 2) the IP POPs can provide a maximum PSTN access rate of 56K, if the PTT infrastructure allows it. ISDN access at 64K will be provided if the PTT provides the service in that city/country.
- 3) the number cannot be accessed from outside the particular country.
- 4) the full number starting with "0" is called for both local and national calls.
- 5) the full number is called for both local and national calls.

- 7) the access point has been tuned for V110, which provides ISDN digital mode access for GSM phones. All other access points provide analogue access for GSM phones.
- 8) the number cannot be called from outside of the city limits.
- 9) in Brazil a number of carriers can be used to support the call: 12 = CTBC telecom, 14 = Brasil Telecom, 15 = Telefonica, 21 = Embratel, 23 = Intelig, 25 = GVT, 31 = Telemar.
- 10) all calls within the country are free.
- 11) GSM access to this number is blocked.
- 12) the number cannot be used in the capital's city limits.
- 13) only one ISDN/PSTN charge band applies across the whole country.
- 14) the toll-free number in India is only available to MTNL and BSNL subscribers.
- 15) In Georgia national calls are made by dropping "32" and adding "822" to the local number.
- 16) In the Ukraine, Toll-free calls outside of Kiev need to have "8" added to the front of the number.
- 17) In Canada and the USA a number of the cities have changed to 10 digit dialling for the local number.

These telephone numbers are provided for the exclusive use of our contracted customers.

The list of available locations is subject to change as warranted by regulatory developments.

notes:

- 1) the maximum speed supported at X.28 low speed/high speed access points is 14.4K/28.8K respectively. The PTT infrastructure may restrict access to lower speeds.
- 2) the IP POPs can provide a maximum PSTN access rate of 56K, if the PTT infrastructure allows it. ISDN access at 64K will be provided if the PTT provides the service in that city/country.
- 3) the number cannot be accessed from outside the particular country.
- 4) the full number starting with "0" is called for both local and national calls.
- 5) the full number is called for both local and national calls.

- 7) the access point has been tuned for V110, which provides ISDN digital mode access for GSM phones. All other access points provide analogue access for GSM phones.
- 8) the number cannot be called from outside of the city limits.
- 9) in Brazil a number of carriers can be used to support the call: 12 = CTBC telecom, 14 = Brasil Telecom, 15 = Telefonica, 21 = Embratel, 23 = Intelig, 25 = GVT, 31 = Telemar.
- 10) all calls within the country are free.
- 11) GSM access to this number is blocked.
- 12) the number cannot be used in the capital's city limits.
- 13) only one ISDN/PSTN charge band applies across the whole country.
- 14) the toll-free number in India is only available to MTNL and BSNL subscribers.
- 15) In Georgia national calls are made by dropping "32" and adding "822" to the local number.
- 16) In the Ukraine, Toll-free calls outside of Kiev need to have "8" added to the front of the number.
- 17) In Canada and the USA a number of the cities have changed to 10 digit dialling for the local number.

These telephone numbers are provided for the exclusive use of our contracted customers.

The list of available locations is subject to change as warranted by regulatory developments.

notes:

- 1) the maximum speed supported at X.28 low speed/high speed access points is 14.4K/28.8K respectively. The PTT infrastructure may restrict access to lower speeds.
- 2) the IP POPs can provide a maximum PSTN access rate of 56K, if the PTT infrastructure allows it. ISDN access at 64K will be provided if the PTT provides the service in that city/country.
- 3) the number cannot be accessed from outside the particular country.
- 4) the full number starting with "0" is called for both local and national calls.
- 5) the full number is called for both local and national calls.

- 7) the access point has been tuned for V110, which provides ISDN digital mode access for GSM phones. All other access points provide analogue access for GSM phones.
- 8) the number cannot be called from outside of the city limits.
- 9) in Brazil a number of carriers can be used to support the call: 12 = CTBC telecom, 14 = Brasil Telecom, 15 = Telefonica, 21 = Embratel, 23 = Intelig, 25 = GVT, 31 = Telemar.
- 10) all calls within the country are free.
- 11) GSM access to this number is blocked.
- 12) the number cannot be used in the capital's city limits.
- 13) only one ISDN/PSTN charge band applies across the whole country.
- 14) the toll-free number in India is only available to MTNL and BSNL subscribers.
- 15) In Georgia national calls are made by dropping "32" and adding "822" to the local number.
- 16) In the Ukraine, Toll-free calls outside of Kiev need to have "8" added to the front of the number.
- 17) In Canada and the USA a number of the cities have changed to 10 digit dialling for the local number.

These telephone numbers are provided for the exclusive use of our contracted customers.

The list of available locations is subject to change as warranted by regulatory developments.

	NY - Plattsburgh	NYC	(1) 518 9074049	ISDN & PSTN	IP	
	NY - Port Chester	NYC	(1) 914 9085526	ISDN & PSTN	IP	
	NY - Poughkeepsie	NYC	(1) 845 2243846	ISDN & PSTN	IP	

notes:

- 1) the maximum speed supported at X.28 low speed/high speed access points is 14.4K/28.8K respectively. The PTT infrastructure may restrict access to lower speeds.
- 2) the IP POPs can provide a maximum PSTN access rate of 56K, if the PTT infrastructure allows it. ISDN access at 64K will be provided if the PTT provides the service in that city/country.
- 3) the number cannot be accessed from outside the particular country.
- 4) the full number starting with "0" is called for both local and national calls.
- 5) the full number is called for both local and national calls.

- 7) the access point has been tuned for V110, which provides ISDN digital mode access for GSM phones. All other access points provide analogue access for GSM phones.
- 8) the number cannot be called from outside of the city limits.
- 9) in Brazil a number of carriers can be used to support the call: 12 = CTBC telecom, 14 = Brasil Telecom, 15 = Telefonica, 21 = Embratel, 23 = Intelig, 25 = GVT, 31 = Telemar.
- 10) all calls within the country are free.
- 11) GSM access to this number is blocked.
- 12) the number cannot be used in the capital's city limits.
- 13) only one ISDN/PSTN charge band applies across the whole country.
- 14) the toll-free number in India is only available to MTNL and BSNL subscribers.
- 15) In Georgia national calls are made by dropping "32" and adding "822" to the local number.
- 16) In the Ukraine, Toll-free calls outside of Kiev need to have "8" added to the front of the number.
- 17) In Canada and the USA a number of the cities have changed to 10 digit dialling for the local number.

These telephone numbers are provided for the exclusive use of our contracted customers.

The list of available locations is subject to change as warranted by regulatory developments.

notes:

- 1) the maximum speed supported at X.28 low speed/high speed access points is 14.4K/28.8K respectively. The PTT infrastructure may restrict access to lower speeds.
- 2) the IP POPs can provide a maximum PSTN access rate of 56K, if the PTT infrastructure allows it. ISDN access at 64K will be provided if the PTT provides the service in that city/country.
- 3) the number cannot be accessed from outside the particular country.
- 4) the full number starting with "0" is called for both local and national calls.
- 5) the full number is called for both local and national calls.

- 7) the access point has been tuned for V110, which provides ISDN digital mode access for GSM phones. All other access points provide analogue access for GSM phones.
- 8) the number cannot be called from outside of the city limits.
- 9) in Brazil a number of carriers can be used to support the call: 12 = CTBC telecom, 14 = Brasil Telecom, 15 = Telefonica, 21 = Embratel, 23 = Intelig, 25 = GVT, 31 = Telemar.
- 10) all calls within the country are free.
- 11) GSM access to this number is blocked.
- 12) the number cannot be used in the capital's city limits.
- 13) only one ISDN/PSTN charge band applies across the whole country.
- 14) the toll-free number in India is only available to MTNL and BSNL subscribers.
- 15) In Georgia national calls are made by dropping "32" and adding "822" to the local number.
- 16) In the Ukraine, Toll-free calls outside of Kiev need to have "8" added to the front of the number.
- 17) In Canada and the USA a number of the cities have changed to 10 digit dialling for the local number.

These telephone numbers are provided for the exclusive use of our contracted customers.

The list of available locations is subject to change as warranted by regulatory developments.
