

how to use this guide:

This guide provides the access numbers for our X28 Dial access service.

to dial a number:

1. choose the nearest location for the subscribed service;
2. insert numbers with local dialing prefix into your PC dial application;
3. initiate call from application.

help

If you encounter a problem, check:

- * that you have entered the correct telephone number;
- * that any access digit (e.g., 0 or 9 for an outside line) is correct;
- * that you are using the correct local dialing instructions (remove the country code);

- * whether the telephone line is using pulse or tone and set your communications software accordingly;
- * that there is a dial tone on the line;

* if you believe it to be an application problem, please follow the fault reporting procedure of the application provider;

* if any of these do not resolve the problem, please consult your Customer Service Center Directory or www.orange-business.com for your nearest support center.

regulatory Information

These telephone numbers are provided for the exclusive use of our contracted corporate customers. The list of available locations is subject to change as warranted by regulatory developments.

news and highlights in this edition

service coverage:

total countries	144
total access points	191
local call countries	20
high speed access points	171

change summary:

- 1) New site installation none
- 2) Telephone number change Nicaragua: new dial plan with a new digit (additional '2') / hotcut on **April 1st 2009**
- 3) Site Removal Costa Rica (San José X28 PAD)
Bolivia (Santa Cruz and Cochabamba X28 PADs)
Taiwan (Hsinchun and Tainan X28 PADs)

new country availability:

No changes this month

new site installation:

none

telephone number change:

country	city	old number	new number	date	
Nicaragua	Managua	[505] (0) 2669786	[505] (0) 2 2669786	1 April 2009	

site removal:

country	city	old number	new number	date	reason
Costa Rica	San José	[506] 22870800	[506] 22574104	21 April 2009	X.28 concentration
Bolivia	Santa Cruz	[591] (0)3 3322422	[591] (0)2 2407112	29 April 2009	X.28 concentration
Bolivia	Cochabamba	[591] (0)4 4502088	[591] (0)2 2407112	29 April 2009	X.28 concentration
Taiwan	Hsinchun	[886] (0)3 5358146	[886] (0)3 3931211	1 May 2009	X.28 concentration
Taiwan	Tainan	[886] (0)6 2361955	[886] (0)7 3234977	1 September 2009	X.28 concentration

notes:

- 1) the maximum speed supported at X.28 low speed/high speed access points is 14.4K/28.8K respectively. The PTT infrastructure may restrict access to lower speeds.
- 2)
- 3) the number cannot be accessed from outside the particular country.
- 4) the full number starting with "0" is called for both local and national calls.
- 5) the full number is called for both local and national calls.
- 6) national calls in Bolivia require the operator prefix for Entel-Datacom, AES, Cotas of 010, 011 and 012 respectively.
- 7)
- 8)
- 9) in Brazil a number of carriers can be used to support the call: 12 = CTBC telecom, 14 = Brasil Telecom, 15 = Telefonica, 21 = Embratel, 23 = Intelig, 25 = GVT, 31 = Telemar.
- 10)
- 11)
- 12) the number cannot be used in the capital's city limits.
- 13) only one PSTN/ISDN charge band applies across the whole country.
- 14)
- 15) In Georgia national calls are made by dropping "32" and adding "822" to the local number.
- 16)
- 17) In Canada and the USA a number of the cities have changed to 10 digit dialling for the local number.

These telephone numbers are provided for the exclusive use of our contracted customers.

The list of available locations is subject to change as warranted by regulatory developments.

totals

total countries	144
total access points	191
local call countries	20

notes:

- 1) the maximum speed supported at X.28 low speed/high speed access points is 14.4K/28.8K respectively. The PTT infrastructure may restrict access to lower speeds.
- 2)
- 3) the number cannot be accessed from outside the particular country.
- 4) the full number starting with "0" is called for both local and national calls.
- 5) the full number is called for both local and national calls.
- 6) national calls in Bolivia require the operator prefix for Entel-Datacom, AES, Cotas of 010, 011 and 012 respectively.
- 7)
- 8)
- 9) in Brazil a number of carriers can be used to support the call: 12 = CTBC telecom, 14 = Brasil Telecom, 15 = Telefonica, 21 = Embratel, 23 = Intelig, 25 = GVT, 31 = Telemar.
- 10)
- 11)
- 12) the number cannot be used in the capital's city limits.
- 13) only one PSTN/ISDN charge band applies across the whole country.
- 14)
- 15) In Georgia national calls are made by dropping "32" and adding "822" to the local number.
- 16)
- 17) In Canada and the USA a number of the cities have changed to 10 digit dialling for the local number.
