

Managed LAN

demand more from
your network – then
forget about it

“Managed LAN gives me access to a local network designed with my company and my staff in mind. I can call on technical skills I don't have internally as well as personalized assistance services.”

Denis S.
Information Systems Manager

- simple turnkey solution for managing LAN and wireless LAN infrastructure
- built-in security and reliability for improved service levels
- seamless global service integrated with IP VPN in more than 150 countries
- wide range of options allows you to take control of your network based on your business requirements
- lower costs and improved performance with less administrative and management overhead
- pay-as-you-go pricing means no capital expenditure required

**Business
Services**

simplify the day-to-day management of your LAN

- Enjoy a simple, turnkey solution. Based on your needs, our certified consultants will design your LAN or wireless LAN. Count on their advice concerning future developments in line with your business and technical requirements.
- Our field service experts in over 150 countries are available to assist you with international logistics and installation. Our 24x7 service desk supervises your operational LAN environment, resolves issues and secures your network.
- Simple tools, dedicated customer care and a "one-stop-shop" let you manage your service in real time.
- By reducing travel miles, you will contribute to your company's good citizenship by reducing CO₂ emissions. Our teams are local and will act as your own IT staff.

take control of your LAN budget

- Eliminate network investments and capital expenditures from your balance sheet and keep your budget and cash flow focused on your business.
- The service includes multiple, flexible options and all the hardware you need.
- One contract and one monthly bill simplify accounting, no matter what the coverage.

improve service levels

- Hand your entire infrastructure over to a single, experienced provider who can deliver operational reliability according to strict service level standards for all your WAN, LAN and WLAN needs. Interoperability issues and multi-partner management will be a thing of the past.
- Managed LAN supports even the most demanding multimedia and business applications and is completely compatible with other VPN, voice and video solutions.
- You gain visibility through monthly reporting and control performance according to your specific SLAs.
- As a major worldwide integrated operator with an extensive service portfolio, we also offer a full range of additional options, including site audits, geolocation services, managed user authentication services and onsite management.

good to know

We have met Cisco's highest standards of networking competency, service, support and customer satisfaction around the world to become a Cisco® Global Certified Partner service provider.
