

# Network Protect

## remote site security in a flash

*“With Network Protect, I was able to secure all my company’s remote sites on a limited budget.”*

- in a world where all types of communications are on the increase and new regulatory restrictions need to be followed, branch and remote site security is a key requirement for multinational companies
- Network Protect is a managed solution with advanced security functions integrated into the router, providing both connectivity and security for branch sites at an affordable price

**Business  
Services**

### **a simple solution for establishing remote-site security for your VPN**

- add security to your existing router and avoid the need to deploy additional equipment to safeguard your branch sites
- enjoy the benefits of an end-to-end managed offer with automatic intrusion prevention
- use also for sites with Internet Direct and Small Office Solutions

### **a modular solution with leading-edge technology**

- implement remote access to the firewall with the ability to apply a global security policy to all your corporate sites or customize rules site by site
- take full advantage of the newest generation of routers with integrated capabilities

### **a complete security solution**

- define firewall filtering rules between three different zones
- stop viruses from entering your corporate network with an integrated intrusion prevention system
