

Secure Mobile Pass

anytime, anywhere
access with any
Web-enabled device

“With Secure Mobile Pass we have been able to maximize our workforce productivity while still enforcing the security that we need on our corporate network.”

highlights

- remote employee access via SSL to your corporate network and applications from any device, regardless of location, time or the device's security
- granular control of users' access to a specific set of applications with auditing and tracking
- safe and secure, controlled access to your network for vendors, partners and/or customers
- comprehensive security check on endpoints for all access requests
- SSL gateway, fully managed by Orange for reduced operational risk and optimal service delivery

**Business
Services**

three functions ... one solution

Secure Mobile Pass features a completely managed solution with best-in-class performance, scalability and redundancy for organizations with high-volume, secure access and authorization requirements. And it's perfectly compatible with Business Everywhere, our mobility product suite.

global remote access for employees

- access your corporate network via SSL from any location, such as home, an airport or hotel, with any Web-enabled device, such as a laptop, an Internet kiosk or a mobile phone
- no longer install, maintain and support client software on individual devices
- protect your assets by granting access only until after a comprehensive endpoint security check is performed
- leave internal server changes and costly ongoing maintenance and support to the experts at Orange

secure portal for partners

- rapidly extend or cancel access privileges to partners, suppliers and customers
- limit access to select applications and resources
- eliminate the need to maintain and configure users

business continuity anywhere

- meet peak demand with remote access should an emergency occur
- assure employee safety while simultaneously minimizing downtime
- enable flexible working from home or any location with Internet access
- achieve sustainability goals by reducing vehicle miles and air pollution as well as office space and energy costs with hot desking

advantages that meet your objectives

- allow anytime, anywhere access from any Web-enabled device
- dynamically control access to select network resources for employees, partners, vendors and customers
- maximize workforce productivity without inhibiting mobility
- feel confident that your network is accessible yet totally secure
- reduce overall remote access costs

good to know

Juniper SA, our technology partner, holds the top market share in SSL VPN technology deployed by over 10,000 enterprises and service providers worldwide.
