

# Independent report analyses Orange Business Services' Business VPN Galerie

... “Since OBS sets up this consolidated application store in a virtual private cloud leveraging its VPN networking infrastructure, OBS can work with its business customers to architect a solution that optimizes the network for each application and enables more consistent performance for users throughout the organization” ...

... “With OBS’ offering, businesses also have the flexibility of integrating the Business VPN Galerie offering with some of OBS’ enterprise mobility offerings to allow for easier and more consistent access to enterprise applications from any device and any location.” ...

... “By leveraging a solution like Business VPN Galerie, OBS creates a virtual private cloud inside its customers’ corporate WAN, which then provides secure access to any applications selected to be part of the Galerie. This architecture can provide peace of mind as well as a proven security process and architecture for a business.” ...
