Welcome to Webex Devices

In a world with a myriad of technology choices and personal work styles, how do you collaborate and get stuff done at work? It starts with Webex® Devices.

Webex Devices are purpose built to help teams collaborate and create together in real time, no matter how far the distance. From local wireless sharing and high-quality video conferencing to intelligent, connected workspaces, Webex Devices offer rich collaboration experiences to support the needs of your workforce as it evolves.

Based on the RoomOS platform, Webex Devices deliver the same seamless experience in every space and on every device. It's team collaboration without interruption, just inspiration.

Designed for beauty, intelligence, and simplicity

While we take great pride in crafting elegant, award-winning products, our design success reaches beyond aesthetics.

Our goal is to humanize technology, to bring people together, whether across the table or across the globe. By truly understanding our users, we create simple and engaging products that are delightful to install, set up, manage, and use.

When you need this level of ease and excellence combined with exceptional video and crystal clear sound, you call Webex.

It's what's inside that counts

Other companies reference how artificial intelligence (AI) will change the future of collaboration. With Webex, it's already here.

AI-enabled video recognizes meeting participants, gives viewers the relevant context, and automates their tasks and events.

Intelligent experiences completely transforms the status quo for virtual meetings. From the desk to the boardroom, our devices are AI-enabled right out of the box.

On an infinite canvas, your ideas can take shape

Have a great idea? Need to articulate your vision?

Grab the stylus and start collaborating. Webex® video devices enabled with digital whiteboarding and video conferencing are your new best friend.

Draw. Share. Modify.

The whiteboard is infinite and persistent, so you can capture and share your ideas anywhere, anytime.

Built for every workspace and work style

From the home office to conference auditoriums, Webex Devices can accommodate any workspace.

Each component is designed for optimal microphone placement, exceptional audio output, and the best video quality in the market today.

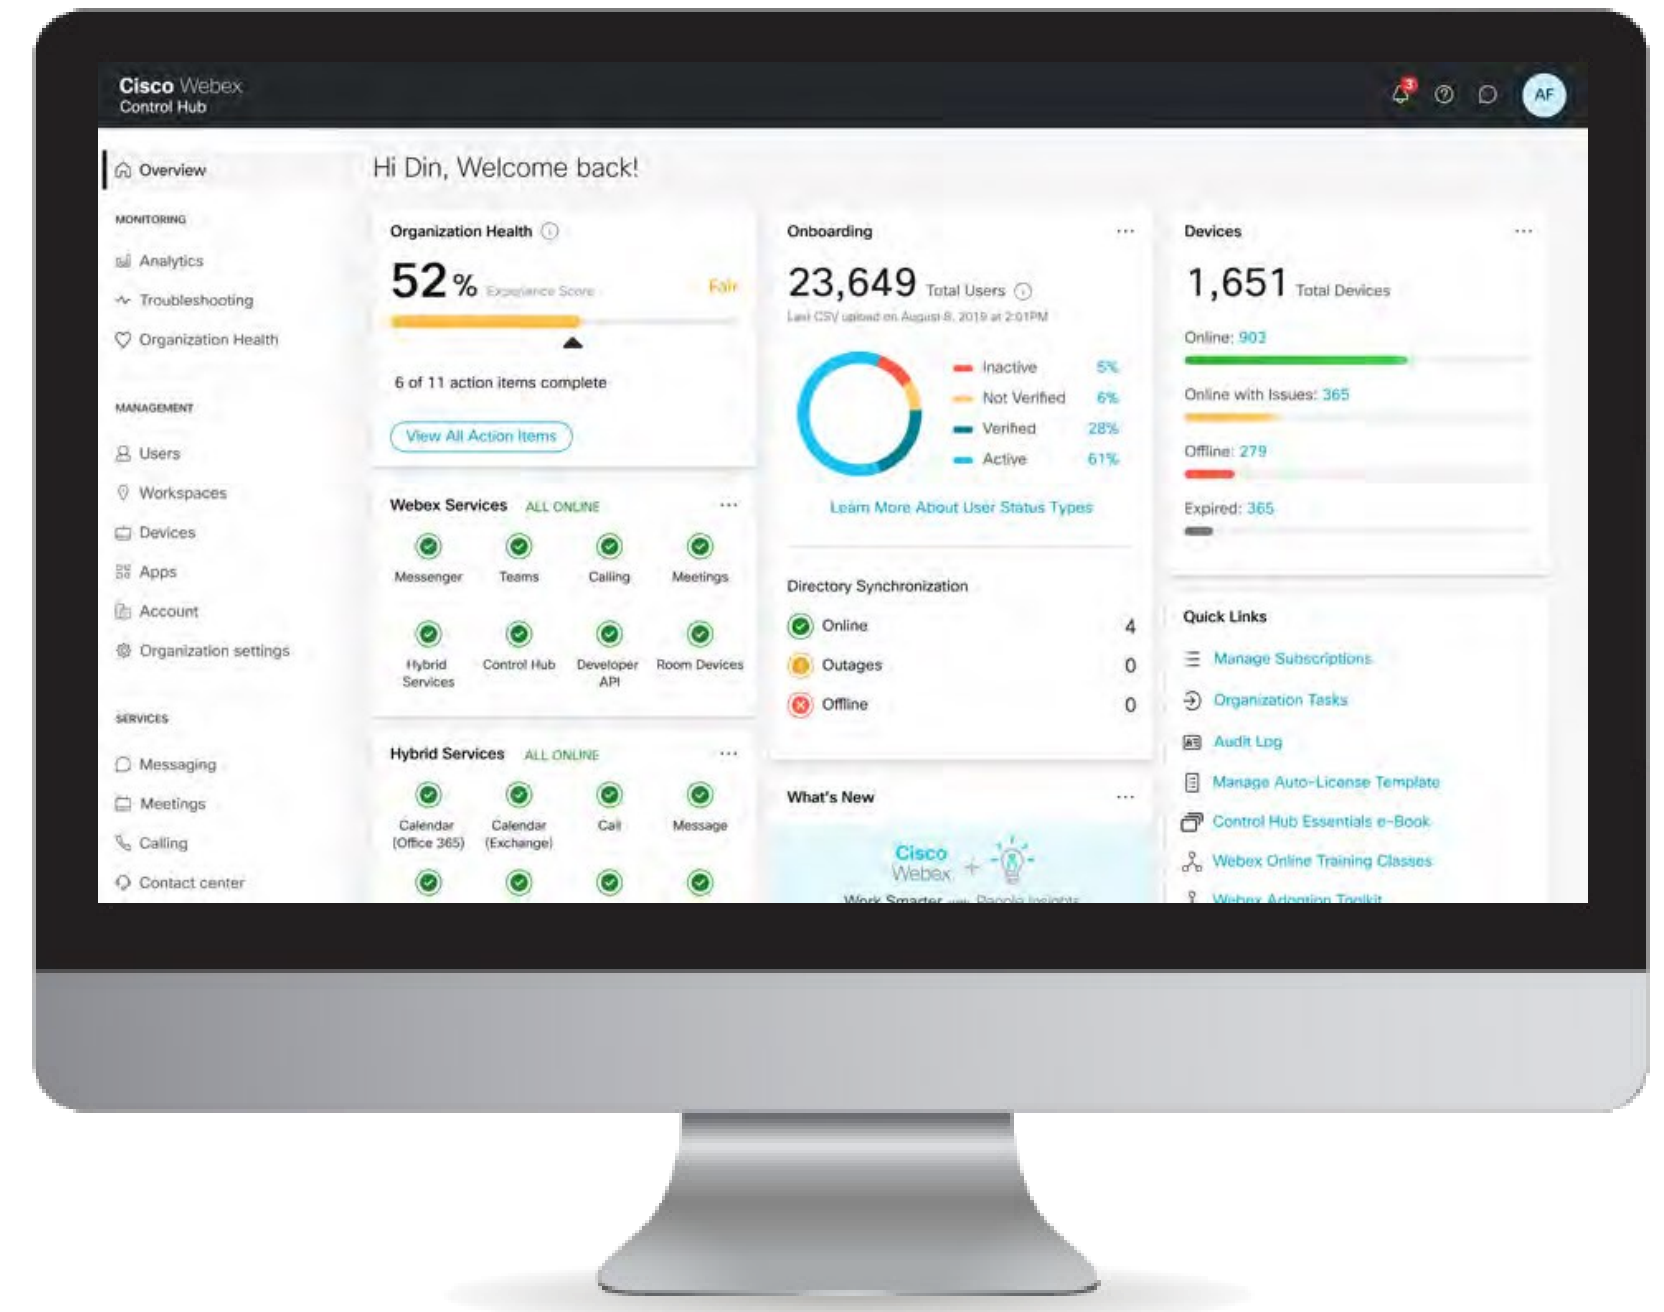

One management tool for a seamless workflow

Whether outfitting one huddle space or redesigning an entire campus, the Webex Control Hub is all you need for device management.

In the cloud? On-premises? Both? No problem.

Ready to provision a new device or remotely wipe one that's been compromised? You got it. Need to deploy signage across hundreds of devices? Absolutely.

Want to monitor workload and productivity analytics in real time? Say no more.

One powerful platform

No Webex device? No problem. All you need is Internet access to download and use Webex anywhere in the world.

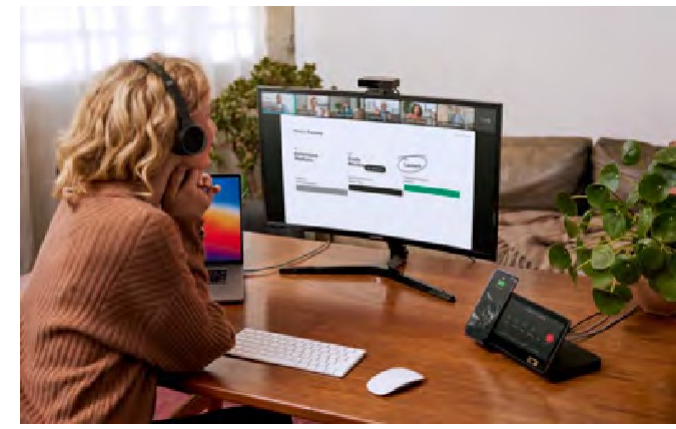

And with multistreaming across multiple screens, you can cast and share work without ever losing eye contact with the team.

Add more custom features like smart calling, messaging, and third-party integrations to create the one-stop, fully immersive experience your employees have been looking for.

Effortlessly move between your virtual and physical worlds
