

Maximize voice user experience with Microsoft Teams collaboration hub

Getting more from Direct Routing for Microsoft Teams

If you have chosen Microsoft Teams as your hub for teamwork, you are just one step away from bringing the best user experience possible to your end-users and administrators.

Phone Management services

- **Global delivery of endpoints** - entry level to feature-rich, high-end executive business phones
- **Change Management** made simple – edit (change name) and/or reconfigure a device (assign device configuration profile) with Business Together with Microsoft self-care
- **Release Management** as and when you need it
 - ✓ Periodic assessment of active firmware and scope validation
 - ✓ Software Updates - Scheduling and coordination at least twice a year
 - ✓ Per phone, per site or the entire global estate
- **Incident Management**
 - ✓ 24/7 global support to troubleshoot configuration issues impacting customers to make calls, transfer or hold

How does it work?

1. Orange creates a Teams account in our self-care portal
2. You register the device in your O365 tenant
3. Orange updates the device with a naming convention – per site/location
4. Ready to manage device (firmware upgrade and configuration profile assignment)

Single provider for both local and global needs

Standardization of your voice solution. Simple and quickly executed.
