Fortify your OT environment with confidence

Secured by

Cyberdefense

Industry 4.0 has transformed operations through IT/OT convergence – driving efficiency and innovation, but also expanding the cyber threat surface.

Ransomware
attacks against
industrial
organizations
rising by

Phishing
responsible for
78%
of OT incidents

Robust and integrated security is more essential than ever.

That's why Orange Business and Cisco deliver a joint solution that combines deep OT visibility, advanced threat detection, and secure connectivity, built to support both resilience and industrial digitalization.

The threat landscape is evolving

- ❑ Ransomware attacks against industrial organizations surged by 87% in 2022.
- ❑ Phishing attacks account for 78% of OT cybersecurity incidents.
- ❑ Nearly 1 in 4 sophisticated attacks targeting OT are attributed to hackers.

Our joint value proposition

	<p>Comprehensive Visibility Cisco Cyber Vision maps all connected OT assets and communication patterns. With Orange Business's support, this enables precise risk assessment and proactive mitigation.</p>
	<p>End-to-End Security We combine secure technologies (Firewalls, ISE) with Orange Business's OT cybersecurity expertise and secure connectivity for full-spectrum protection.</p>
	<p>Automated Segmentation Cyber Vision integrates with security tools for automated OT network segmentation, minimizing lateral movement and impact.</p>
	<p>Advanced Threat Detection Real-time monitoring and anomaly detection from Cyber Vision, enhanced by Orange Business threat intelligence, supports early detection and rapid response.</p>
	<p>Operational Efficiency Improved visibility, faster troubleshooting, and seamless optimization – thanks to Cisco insights and Orange Business's management capabilities.</p>
	<p>Secure Digital Transformation Together, we enable secure Industry 4.0 adoption: predictive maintenance, asset tracking, and data-driven operations.</p>
	<p>Risk Reduction & Compliance Our solution helps reduce the OT attack surface and supports compliance with IEC 62443, NIS 2, and other standards.</p>

The right solution for every stakeholder

 <p>CISOs & Executives</p>	 <p>Technical Specialists and Engineers</p>	 <p>C-Level Leaders</p>
<p>A comprehensive and integrated OT security strategy that reduces business risk, improves overall security posture, and supports regulatory compliance. The partnership between industry leaders ensures a reliable investment and a long-term vision.</p>	<p>The deep visibility into OT traffic provided by Cisco Cyber Vision, combined with automated segmentation capabilities and seamless integration with existing IT security tools, simplifies OT security management and provides valuable operational insights for troubleshooting.</p>	<p>This partnership translates into reduced downtime, increased operational efficiency, protection of critical infrastructure, and safeguarding of intellectual property. A secure and reliable OT environment is fundamental for business continuity and successful digital transformation.</p>

Ready to secure your OT environment?

Take the next step toward a resilient, future-proof industrial security strategy.
