

IoT

“Leveraging its operator expertise, Orange Business Services (Orange) continues to develop functional capabilities extending its broad spectrum of IoT services. Its focus on industry-specific point applications, a robust and scalable IoT platform enhanced with Data Analytics and AI, and collaborations with strategic partners allow Orange to offer compelling business-outcome solutions. With a track record of key project wins across Asia-Pacific, Orange is consolidating its position as a regional leader in the IoT space.”

ORANGE BUSINESS SERVICES 2019 ASIA-PACIFIC IOT SERVICE PROVIDER OF THE YEAR

**Business
 Services**

Frost & Sullivan recognizes Orange Business Services (Orange) for its focus on industry-specific point applications, a robust and scalable IoT platform enhanced with Data Analytics and Artificial Intelligence services and collaborations with strategic partners – all of which have enabled the company to offer compelling business-outcome solutions. In the past year, Orange has achieved significant success in the smart city, transport and logistics, and construction verticals across the Asia-Pacific region despite intensifying competition in the segment. Its business-outcome approach to devising a data journey framework for clients has also proven popular among new IoT adopters and firms more experienced with IoT deployments. The 2019 APAC Service Provider of the Year Award acknowledges Orange Business Services’ commitment to providing business-outcome IoT offerings and its success in the Asia-Pacific market in the past year.
