

## Orange Business Services Flexible SD-WAN supports Getinge with increased agility to aid the health industry

- **SD-WAN addresses the needs of a growing distributed workforce**
- **High-speed connectivity accelerates its digital transformation**

Getinge, a leading global supplier of medical technology products and systems, chose Orange Business Services to deploy a software-defined wide area network (SD-WAN). The solution has supported the Sweden-based multinational's network performance, while increasing security and supporting its cloud-first strategy.

The Orange Flexible SD-WAN solution connects more than 100 Getinge sites globally, simplifying the management and operation of its infrastructure. Additionally, the network provides flexibility, scalability and end-to-end visibility, improving both the user and customer experience.

Due to the global pandemic, Getinge has adapted parts of its production and support models related to the production of advanced ventilators and associated devices. Flexible SD-WAN enabled the company to better support rapid changes in the marketplace and fully support its increasingly distributed workforce. Orange also provides cloud and internet security.

### **SD-WAN: an essential tool for a cloud-first strategy**

A cloud-first strategy can impact the network. Flexible SD-WAN offers secure access to the cloud, enabling traffic to flow to the internet from the closest link. The Orange SD-WAN solution provides Getinge with efficient, secure and fully automated end-to-end network orchestration, from end-users to cloud-based applications at an attractive price-performance ratio.

“Flexible SD-WAN from Orange Business Services has helped us build a resilient, secure cloud-based infrastructure that lets us tackle moving business challenges in an unpredictable marketplace. Due to rapidly changing traffic patterns in the network we needed a future-proof solution that enabled us to effectively support the healthcare industry with devices they are most in need – both during the current pandemic and beyond,” said Ludovic Batal, CIO, Getinge.

“Getinge is on a strong transformational path with its SD-WAN infrastructure. We are pleased that the company chose Orange as its partner on this exciting journey in moving its operations to the cloud. Providing efficient, flexible and secure networking services is key to

this transformation,” says Fabrice de Windt, senior vice president, Europe, Orange Business Services.

#### **About Getinge**

With a firm belief that every person and community should have access to the best possible care, Getinge provides hospitals and life science institutions with products and solutions that aim to improve clinical results and optimize workflows. The offering includes products and solutions for intensive care, cardiovascular procedures, operating rooms, sterile reprocessing and life science. Getinge employs over 10,000 people worldwide and the products are sold in more than 135 countries.

#### **About Orange Business Services**

Orange Business Services is a network-native digital services company and the global enterprise division of the Orange Group. It connects, protects and innovates for enterprises around the world to support sustainable business growth. Leveraging its connectivity and system integration expertise throughout the digital value chain, Orange Business Services is well placed to support global businesses in areas such as software-defined networks, multi-cloud services, Data and AI, smart mobility services, and cybersecurity. It securely accompanies enterprises across every stage of the data lifecycle end-to-end, from collection, transport, storage and processing to analysis and sharing.

With companies thriving on innovation, Orange Business Services places its customers at the heart of an open collaborative ecosystem. This includes its 27,000 employees, the assets and expertise of the Orange Group, its technology and business partners, and a pool of finely selected start-ups. More than 3,000 multinational enterprises, as well as two million professionals, companies and local communities in France, put their trust in Orange Business Services.
