

International Ethernet Link

“The any-to-any connectivity of International Ethernet Link helped us to consolidate our IT infrastructure by linking every subsidiary around the world for better data flows.”

new **high-speed Ethernet** network to **consolidate** your data centers

highlights

- multinational companies are facing huge growth in network data traffic as they consolidate data centers and centralize servers
- International Ethernet Link is designed to be familiar, flexible and secure enabling rapid, high-speed communications in 30 countries
- supported by a new-generation virtual private LAN service (VPLS) Ethernet network, our service includes granular high-speed bandwidth up to 1 Gbps, sophisticated service-class management and best-in-class service level agreements
- high-level security and performance are guaranteed through our international fiber network

Business
Services

optimize your connection costs with Ethernet benefits

- connect your data centers and your principal sites worldwide, and rationalize your architecture
- use your existing equipment on a unique network standardized by the Metro Ethernet Forum
- prioritize your flows by standard, critical, real-time and voice with service-class management

enjoy exceptional global coverage and high bandwidth

- choose from speeds ranging from 2 Mbps to 1 Gbps
- benefit from a proven Ethernet network that spans metropolitan areas in 30 countries on six continents
- take advantage of the wide reach of our new-generation Ethernet VPLS network and our agreements with third-party Ethernet providers

choose an end-to-end, secure and managed Ethernet network

- relax with a turn-key solution, fully designed, installed and managed by Orange Business Services
- opt for quality of service with strong commitments for recovery (4 hours in France and 5 hours elsewhere), availability (from 99.50% to 99.97%) and performance (round-trip delay optimized)
- rely on personalized help services: real-time, web-based network performance monitoring and expert advice to optimize your network infrastructure

good to know

trust our experts to connect your main sites abroad

You can count on the expertise of Orange Business Services to design and run your LAN interconnection network all around the world: the trust of 3,700 multinational corporations, a local presence in 166 countries and territories, including 1,500 field technical experts, 18 research centers on 4 continents and 4 multilingual global support centers.
