

An optimal voice experience with the Microsoft Teams collaboration hub

Direct Routing for Microsoft Teams

You have chosen Microsoft Teams as your hub for teamwork, and you want your users to have the best experience possible.

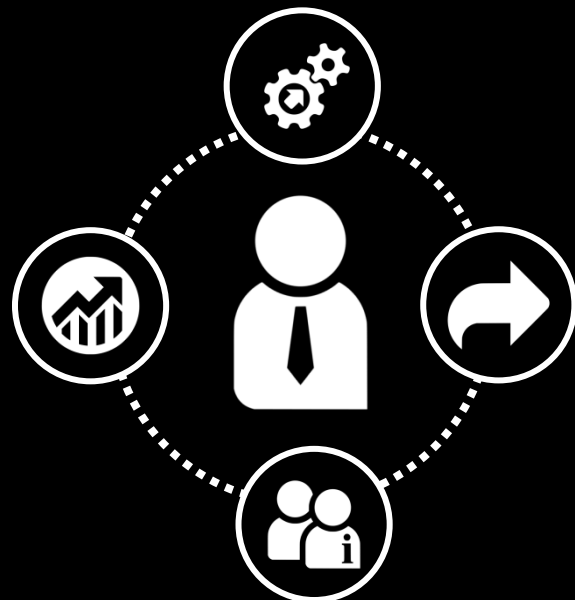

- Business Together Microsoft and Business Talk Direct Routing services enable PSTN calling wherever you need it.
- Minimize onsite equipment by leveraging our cloud-based architecture
- Simplify your operations and optimize costs with one worldwide voice provider
- Digital voice enables you to order, configure and manage your international voice services in real time for maximum flexibility and control.
- Option for local gateways to connect to PSTN and comply with regulations and/or interoperate with legacy telephony systems

Business Talk SIP Voice

Orange is excited to announce our capability to connect Business Talk SIP trunks to Microsoft Teams.

Orange Business Talk SIP trunking enables Phone System users to:

- Call between your corporate offices from 142 countries and territories
- Call outside your company in 80 countries
- Local voice service in over 50 countries (DID), Emergency Services from 28 countries
