

# Your mobile workspace, for more convenient collaboration anywhere

## Mobile and Unified Communication and Collaboration with Orange

### Mobilize your teams to boost success

Your mobile is your companion, anywhere, anytime to do a multitude of tasks. It keeps you in contact with friends, family, your car, your home. In fact, just about anything you choose. It's your own personal hub centered around you, so why not extend that familiarity and functionality to your professional life? Foster innovative teamwork and business productivity through Mobile UCC as your perfect work companion for real-time collaboration in your mobile-centric world.

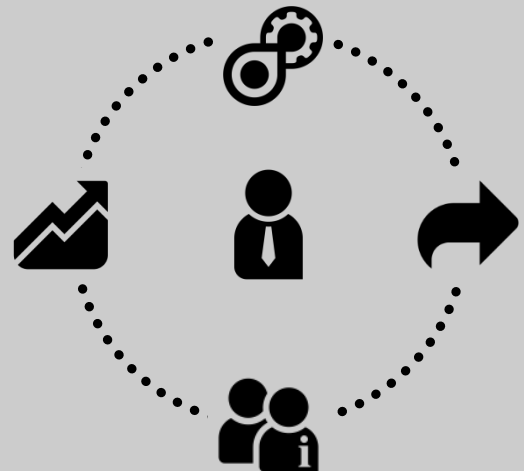

#### Our cloud-based collaboration model includes:

- Mobile UC functionalities using Cisco Webex Teams, Microsoft Skype for Business, and Teams
- A powerful Unified Endpoint Management (UEM) solution focused on security and threat management that lets you deploy, maintain and secure applications on mobiles and desktops
- Optimal experience with many network connection options, including Wi-Fi, 3G, 4G and VPN

### One tap to connect and collaborate safely

Our complete solution can supercharge productivity throughout your organization:

- Drive success through smarter ways of working
- Boost user engagement, standardize collaboration and mobilize business processes
- Enjoy the convenience of secure, native access and easy management with one subscription to protect all your sites, devices and services

**Business  
Services**

# My mobile is my work companion

We take into account your business objectives and user preferences to co-design the best approach for you. Mobile UCC provides a personalized and outstanding user experience and full control and visibility with reporting and analysis and is easy to access, easy to manage and easy to use.

## Global end-to-end support: from Consulting to Operational Services

We take care of everything, from envisioning your solution to driving value through adoption and success management.

We help enterprises avoid the risk of an unsuccessful rollout by focusing on proper planning, proof of concept, global deployment and lifecycle service management.

## Best-in-class collaboration solutions

Fully integrating your mobile devices with Cisco Webex Teams, Microsoft Skype for Business or Teams gives your users access to a range of UC collaboration services through a single device:

- Default dialer
- Call waiting
- Recent calls
- Swap between different types of calls
- Chat
- Video meetings
- Presence management
- Screen and file sharing
- White boarding

Business integration through APIs, bots and to enhance workflow processes

## Unified Endpoint Management (UEM) with Device Management Premium

- Manage and secure devices with Mobile Device Management
- Deploy and secure applications with Mobile Application and Content Management
- Control access to cloud services and data sharing
- Use a transparent Single Sign-on (SSO)
- Automatically distribute mobile apps based on user profile

## Telecom Expense Management

Device and supplier management to control costs

**We deliver a solution around your company identity, your business objectives and your user preferences.**
