

Your SD-Branch checklist: empowering your branches with software-defined networking

Recent events have brought about many new challenges for enterprises. As a result, enterprises are re-evaluating their branch office infrastructure to address changing work practices with goals to optimize TCO and improve user experience in workspaces.

Branches, offices, and remote facilities need all the benefits of your corporate network no matter where they are. Your end-users need seamless access to corporate productivity and collaboration tools, enterprise apps, and cybersecurity at all times. And you need to provide this often without on-site IT skills in the branch. Your sites carry their own unique challenges too: retail outlets need to reduce the costs of truck rolls and site visits to stay profitable. Corporate offices need to optimize site space and seating costs to address hybrid work models. Industrial facilities and factories need to enable predictive maintenance on-site and reduce downtime.

To do all this you need flexibility and agility without incurring big costs. SD-Branch is the solution you need.

What's on your branch wish list?

Centralized management and orchestration

- ✓ SD-Branch encompasses SD-WAN, LAN, Wifi and security, empowering your modern branches
- ✓ Enhanced control of network and security functions via a single pane of glass
- ✓ Lower support costs and maintenance contracts through fewer vendors and multiple functions in one box
- ✓ Simpler deployment of solutions at branch locations and reduce need for on-site IT skills
- ✓ Centrally automated deployment, management, and operation of wired, wireless, WAN, and security infrastructure

Robust cybersecurity

- ✓ Visibility, automation, and security at branch level
- ✓ Zero Trust and SASE frameworks for next-generation security
- ✓ Enable consistent security policies to be deployed across sites and remote users

Maximize resources and ROI

- ✓ Phase out traditional, time-consuming and costly IT implementations with zero touch
- ✓ Rapidly deploy and provision network branch-in-a-box solutions at new sites with 4G/5G
- ✓ Smaller hardware footprint suits space-constrained branches
- ✓ Less need for IT team visits to branches drives cost and time savings

Streamlined branch operations and cost savings

- ✓ Increased operational agility
- ✓ Lower power consumption
- ✓ Frees up your IT teams to focus on innovation

Why Orange Flexible SD-Branch powered by Cisco Meraki?

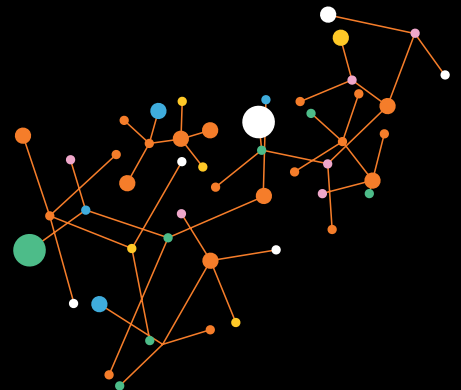

Our strong, long-term partnership with Cisco as a Gold Partner means you benefit from our years of expertise and experience through cutting edge solutions and world class support.

- We help you simplify your procurement, operations and reduce risk through working with a single, managed services partner across SD-WAN, LAN, Wi-Fi and security
- You can ensure your business challenges are addressed by working with a partner who understands your whole journey from end to end. Design, deployment in many countries, managing your service around 24/7 and transforming with you as your needs evolve

- We make regional and global operations easy – through central procurement and billing, a single monthly billing across WAN and all equipment, and global help desk
- We help you manage your branches with ease, while reducing costs and driving reliability and agility

Together, our SD-Branch offering gives you everything you need to enable the new requirements of your branch offices and sites.
