Global end-to-end support
From Consulting to Operational Services

Best-in-class collaboration solution

Business Talk SIP Voice

We take care of everything, from envisioning your solution to driving value through adoption and success management.

We help enterprises avoid the risk of an unsuccessful rollout by focusing on proper planning, proof of concept, global deployment and lifecycle service management.

Webex Calling delivered by Orange is a Cisco cloud-based collaboration model

- Advanced telephony features, including auto-attendant, shared call appearances and the majority of common PBX features
- Cisco Webex Teams, with messaging, screen sharing, audio and video conferencing for up to three participants
- Option to add Webex Meetings and choose from the entire Cisco multi-platform phone and headset portfolio, along with the complete range of Cisco video endpoints

Business Talk enables PSTN calling wherever you need it.

- Call outside your company
- Local voice (DID, Emergency Services)

We offer the simplicity of one voice provider plus cost optimization.

Digital voice enables you to order, configure and manage your international voice services in real time for maximum flexibility and control.

Webex Calling delivered by Orange benefits your business objectives and your users' needs.
